

The ETS Test Collection provides microfiche copies of some unpublished tests as a service to educators and psychologists. New tests developed by individuals and organizations throughout the country often are mentioned or described in the professional literature. However, just as often, the actual instruments are not reproduced, and in many instances, may be obtained only through correspondence with the authors, who are frequently difficult to locate. Through the ETS Test Collection, many of these unpublished tests are made available in microfiche.

The best index for this collection is located online at <http://www.ets.org/testcoll/> or a second choice is: <http://ericae.net/testcol.htm>. Once you have located the number of the test you want to use, search Addison (online catalog) by the collection's name (ETS test collection) to determine if we own that particular fiche number. *Note that we do not have a fiche for every test on the database.* Tests on fiche are filed by their TC number.

sample record for test on fiche:

Call number..... TC013240
 Purchase..... Email library@ets.org or Phone 1-609-734-5689
 Title..... Vocational Education Administration Questionnaire.
 Author..... [Wilson, Alfred P](#)
 Author..... [Neely, Margery A](#)
 Author..... [Legg, Marilyn R](#)
 Author..... [Schuley, Marcia R.](#)
 Availability.... Tests in Microfiche, Test Collection, Educational Testing
 Service, Princeton, NJ 08541
 Year..... 1978
 Test Acronyms... [TIM\(L\)](#)
 Code..... 9505
 Major Descript.. [Females](#)
 Major Descript.. [Kansas](#)
 Major Descript.. [Vocational Education](#)
 Major Descript.. [Managerial Occupations](#)
 Major Descript.. [Sex Bias](#)
 Minor Descript.. [Adults](#)
 Minor Descript.. [Supervisor Qualifications](#)
 Abstract..... Questionnaire developed as part of a study to investigate a program to help overcome sex-biased barriers to administrative positions in vocational education for women. The questionnaire was used as a survey instrument to determine conditions in vocational education posts in Kansas. It also was used to survey the perceived functions of vocational administrators, internal and external barriers for women aspirants, valued qualifications, confidence in ability to perform administrative tasks, and degree of aspirations.

TC NUMBER

TIM acronym – item should be available on fiche

Note that on Addison, the test numbers on the record are not in chronological order. Therefore it is important to check the entire Addison record for the fiche number you are seeking. Also an Addison record may give a range of numbers but when you look at the individual record there may be only a portion of the listed range. For example, a fiche range may be given as 234321– 234451 but we may have only a few of the fiche in that range. If you have any questions about the Addison record, go to the reference desk on the 2nd floor of Newman Library.

The fiche is located in the **Microforms on the first floor of Newman Library**. Maps are available in the microfiche area to help patrons locate specific collections.

Sample record of test available in a journal

Call number..... TC018171
Title..... Computer Anxiety Rating Scale.
Author..... [Heinssen, Robert K](#)
Author..... [And Others](#)
Availability.... Computers in Human Behavior; v3 p49-59; 1987
Year..... 1987
Test Acronyms... [CARS](#)
Code..... 9210
Major Descript.. [Computer Anxiety](#)
Major Descript.. [Attitude Measures](#)
Major Descript.. [College Students](#)
Major Descript.. [Computers](#)
Abstract..... A self-report inventory designed to assess individuals' levels of computer anxiety. Measures behavioral, cognitive, and affective components of computer anxiety. On a five point, Likert-type scale individuals respond to items covering technical capability, appeal of learning about and using computers, being controlled by computers, learning computer skills, and traits to overcome anxiety. Instrument was found to be reliable and valid. May be used to identify individuals who would benefit from counseling to overcome their anxiety of using computers. Includes information on the relationship between computer anxiety and math and test anxiety, amount of computer experience, cognitive styles, and mechanical interests. Technical data are included.
