INTRODUCTION

SURVEY OF VETERINARY MEDICAL LIBRARIES IN THE UNITED STATES AND CANADA

The following survey was produced by the Survey Committee of the Veterinary Medical Libraries Section of the Medical Library Association. At the Section's 1992 Annual Meeting, members requested that the Committee conduct a brief survey of "critical" data **every** year, with an extensive survey every three years. For the 2000/2001 data, it is an extensive survey.

There are 31 academic veterinary medical libraries in the United States and Canada. This is the second time an online version of the survey questionnaire was available for participating libraries to download and submit. Due to retirements and some other unmitigated circumstances, only 23 libraries participated in this survey. The data was compiled by Ross C. Edmonds, Eleanor Garrison, and Victoria T. Kok at the University Libraries of Virginia Polytechnic Institute and State University.

GROUPING THE LIBRARIES

The libraries are grouped following the format established with the 1983/84 survey.

- Group 1:* a separate library that serves primarily the faculty, staff and students of schools of veterinary medicine. This is the most common situation.
- Group 2:* the veterinary collection is housed in separate locations – campus library and a clinical library. Information is reported for the clinical library.
- Group 3:* a separate library unit that serves two or more curricula, including veterinary medicine. These are usually the largest libraries in the survey and include medical, agriculture and general university library collections.

Questions related to the data gathering or statistics presented should be sent to the Project Director/Committee Chair.

Guelph	2	These are staff with a university degree who specialize in providing reference and related services. They are not dedicated solely to OVC but are drawn from a pool of staff with science reference training.	
	3	There is one full time staff person who is present at our circulation/reserve desk during the day. Once again this person is drawn from a pool of staff and does not work solely in OVC.	
	4	We have students who run the circulation/reserve operation after the full time staff depart at 4:30 pm on weekdays and who are the only staff available on the weekends. We also employ students to shelve material.	
	7	The OVC Learning Commons provides service to the entire university. There are about 710 FT faculty at Guelph.	
	15	Undergraduate students from many science programs use the facility. There are about 13,500 undergrads at Guelph.	
	23	There are about 1,650 graduate students enrolled at Guelph.	
	31	The OVC LC is a shared facility between the Library and the College. While acquisitions funds are provided through Library budgets, operational costs come from both the Library and College. For example, the 19 microcomputers in the LC are serviced and upgraded by OVC staff and with OVC funds.	
	35	The College received funding through a federal program called CANARIE which has allowed us to provide and upgrade our video production and teaching technologies.	
	42	We do actually generate quite a lot of revenue from photocopying. Unfortunately it disappears into the university's coffers.'	
	95	data for 2001 calendar year	
	111	OVC LC holds 560 current serials. Even though in question 124 I can list a dollar figure for serials this amount is actually part of a very large single serials budget. At some point in the future a distinct OVC serials amount will disappear from the line of the budget. We've implemented a complex "allocation model" that moves away from individual departmental budgets.'	
	123	These dollar values are in Canadian funds.	
	125	A/V materials are purchased from the monograph budget, or from a separate A/V budget under the control of the Library's A/V specialist.'	
	126	These are centrally funded.	
	190	This figure includes charges and renewals from fiscal year 2001/2	
	200	We have 2 workstations that are dedicated to OPAC and commercial database access. These two machines are "Library" machines - provided and maintained by Library systems staff. In addition we have 19 workstations that are connected to the OVC's network. These are multifunction machines that provide access to all Library resources and (if the user can log onto the OVC network) access to OVC supported resources like MS Office.'

DEADLINE: Monday, 22 April 2002

- I. General Instructions: The following questionnaire is the “Full Survey” and updates all information from 1998/99. Please answer all questions as completely as possible, using the codes noted below when necessary. If data available varies from the question asked in any way, please use an “X” and add a note at the end in Section H, Explanatory Notes.
- II. Reporting period: Report all data from your fiscal year. This typically will be July 2000 – June 2001 or September 2000 – August 2001.
- III. Codes: It is important that the following codes are applied consistently:
- “E” after any data which is estimated
 - “NA” for items not applicable
 - “UA” for data which is unavailable
 - “X” for responses/notes listed at the end*
- * Please explain any unusual data on the Explanatory Notes page at the end of the questionnaire.
- IV. The majority of questions are the same as those found in previous surveys and the same major categories have been used. New questions have been added and some older questions have been deleted based on suggestions and review by committee.
- V. In order to provide consistency in reporting, the survey results will be tabulated by the same groups of libraries used since the 1983/84 survey. If you have any questions please contact:

Other, please specify: _____	_____	6

Clientele

Please identify the schools or programs for which your library is the primary resource and report the number of faculty and students who are the primary clients of your library.

Primary clients: Those persons for whom your library is the principal or primary library; i.e. those clients who do not have another library that serves as a primary library for them.

Do not count individuals twice if they are associated with more than one program. Count only full-time equivalent FTE faculty. Professional students are those enrolled in the terminal degree program such as DVM, MD, etc. Graduate students would be those enrolled in MS and PhD programs. Note: the majority of responding libraries will have primary clientele from Veterinary Medicine only. Do not count technical/support staff unless they have faculty status.
